CASE STUDY

STOCK BLANKS / IN-HOUSE ENGINEERING

1" UNC × 2 3/4"

12.9 · 1960 pattern socket head cap screws

Manufactured in-house from 12-inch stock blanks, cut to length, screw-cut, deburred and inspected, with 3.1 and mill certificates.

Product	1960 pattern socket head cap screw
Thread / length	1" UNC / 2 3/4"
Grade designation	12.9, as specified
Starting stock	12-inch blanks
Operations	Cutting, screw-cutting and deburring
Inspection / documentation	Inspection; 3.1 and mill certificates

Stock availability. Flexible manufacturing.

A comprehensive blank range and high inventory levels support a responsive approach to customer requirements. Centrally located in-house engineering combines machining flexibility with single-source purchasing and global logistics support.

Certified material retained for future requirements

Usable surplus material remaining after cutting is returned to stock with its certification retained, providing documented material for future manufacturing requirements.
