CASE STUDY

CUSTOMER-SPECIFIC MACHINING

M33 × 165 Grade 10.9

Socket head cap screws with drilled heads

Manufactured from stock blanks, cut to length and screw-cut, with head drilling completed to the customer’s drawing.

Product	Socket head cap screw
Size / property class	M33 × 165 mm / 10.9
Specified standard	ISO 4762
Starting material	Stock blanks
Machining	Cutting to length and screw-cutting
Additional operation	Head drilling to customer drawing

Stockholding and machining from a single source

Stock blanks provided the starting point for machining the required length and thread. The heads were then drilled to the customer’s drawing to incorporate the specified modification.

Victory Fasteners combines stockholding and machining capabilities to supply fasteners with customer-specific features. Send your drawing and specification to discuss your requirements.
